SUMMARY

Full-stack product engineer, 7+ years at startups from bootstrapped to Series C. I build products end-to-end: talking to users, designing flows, shipping intuitive & delightful software, and maintaining the customer relationship. I have launched zero-to-one products and built on top of enterprise systems.

Tech & Tools: Claude Code, agentic workflows, TypeScript, React, Node.js, Python, PostgreSQL, Redis, AWS

WORK EXPERIENCE

Software Engineer, *Strider Technologies* *(Series C)* – Tysons Corner, VA **Sep 2025 – Sep 2026**

- Architected and shipped Resource Center 2.0, a full-stack intelligence hub available to 200+ enterprise customers, with 12K+ tracked content interactions
- Moved base64 images stored in database rows to presigned Amazon S3 uploads with Redis caching, cutting image-heavy article loads from approximately 15 seconds to under 1 second
- Built a Resources API and automated daily sync to Jira Service Management, giving an LLM-powered agent current context to draft responses for the support team

Software Engineer, *HeyTaco* *(Bootstrapped)* – Washington, D.C. **Feb 2024 – Mar 2025**

- Architected and launched HeyTaco for Google Chat from zero to one, owning onboarding and engagement decisions and scaling the product to 10K+ installs
- Launched Instant Gift Cards with a real-time catalog of 2,000+ options, secure transaction processing, and automated delivery
- Reduced Microsoft Teams load times to under one second by optimizing PostgreSQL queries and adding pagination
- Built a data-archival system for 5M+ records spanning eight years, speeding up queries on live data and enabling enterprise deals requiring SOC 2 compliance

UI Engineer, *GOLF+* *(Seed – Series A)* – Remote **Apr 2022 – Jan 2024**

- Owned GOLF+'s in-headset React UI as the Meta Quest app surpassed 1B shots, shipping weekly challenges, tournaments, progression, animations, profiles, and player stats
- Built a crash-diagnostics pipeline that uploaded Quest game-state JSON from device to Amazon S3, enabling team-wide triage instead of per-device bug exports

Software Engineer, *Curiosity Media* *(Bootstrapped)* – Washington, D.C. **Nov 2018 – May 2021**

- Led a site-wide responsive redesign of SpanishDictionary.com (5.5M monthly users) and inglés.com, including hub pages, dictionary results, and grammar articles
- Shipped interactive video grammar lessons teaching Spanish concepts with embedded exercises and progress tracking
- Built a conjugation drill feature for practicing Spanish verbs by category, tense, and pronoun

EDUCATION

BA Computer Science, University of Virginia **2018**
